- Includes RAM® composite base for 1-inch rails and medium length, B size RAM® double socket arm
- Single-screw installation, tightens easily using the included #6-32 screw and nylock nut
- Ball and socket technology allows for near-infinite adjustability
- Backed by a lifetime warranty

| PRODUCT INFORMATION |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| OVERVIEW            | <p>The RAM® Double Ball Rail Mount for Apple MagSafe (2024+) (RAP-B-149-AP-MAG-1U) is designed to integrate the official Apple MagSafe® Charger (2024+) into RAM® ball and socket mounting systems, providing a secure, reliable in-vehicle mounting solution. This adapter offers a snug, precise fit for the newer Apple MagSafe® charging puck, allowing compatible iPhone models to magnetically snap into place when properly aligned. This mounting kit includes a RAM® Composite Ball Base for 1" Rails with B size medium length socket arm, perfect for the RAM® Tough-Bar™. This product is compatible with the RAM Qi2 Wireless Charger and the newer Apple MagSafe® Charger released in 2024 and later. It is not compatible with the original 2020 MagSafe® charging puck. Not sure which MagSafe® charger you have? If your charger cable is braided, it is a newer 2024+ MagSafe® Charger. If the cable is smooth with a soft rubber casing, it is the original 2020 MagSafe® Charger.</p> |

| SPECIFICATIONS          |                                                       |
|-------------------------|-------------------------------------------------------|
